

## CLAIMS

1. A pressurising device for clearing of passageways of liquids and fluids comprising:

- a piston for pressurizing a clearing agent;
- 5       • a cylinder for containing said clearing agent,  
and
- a coupler for connecting said cylinder to a treated device.

10   2. A pressurising device for clearing of passageways as in claim 1 and wherein at least a part of the external surface of said cylinder is threaded for applying a tightening member for tightening said piston.

15   3. A pressurising device as in claim 1 for flushing a hand – piece of a dentist, comprising:

- a piston for pressurizing a cleansing fluid;
- a cylinder for containing said cleansing fluid,  
and
- 20       • a coupler for connecting said cylinder to a coupler of said hand – piece.

4. A pressurising device as in claim 3 and wherein at least a part of the external surface of said cylinder is threaded for applying a tightening member for tightening said piston.
5. A pressurising device for clearing of passageways as in claim 1  
5 for clearing pneumatic system.
6. A pressurising device for clearing of passageways as in claim 1 for clearing hydraulic systems.
